Education

University of Central Florida
Bachelor of Science in Computer Science | Expected May 2027 | Orlando, FL

Work Experience

Brown & Brown, Inc.
Software Engineering Intern | May 2026 – Aug 2026 | Daytona Beach, FL

- Developed a JavaScript VS Code extension following software development life cycle (SDLC) practices to automate pull request risk assessment, multi-stage LLM code reviews, and feedback publishing to GitHub and Azure DevOps, with a projected 80% reduction in review time.
- Developed an LLM benchmarking framework to compare code review quality and performance, guiding model selection across a multi-stage automated PR-review pipeline.
- Built a Python CI/CD pipeline to automate documentation updates, syncing codebase changes to a centralized XWiki platform using REST APIs, Git worktrees, and Entra ID authentication.

Handshake AI
AI Evaluator | Jan 2026 – Present | Remote

- Evaluated AI-generated media and websites for accuracy and instruction following; tested web apps for visual defects, broken interactions, and missing requirements.

UCF College of Sciences
Lead Undergraduate Learning Assistant | Aug 2024 – Present | Orlando, FL

- Guided students in Calculus I, Trigonometry, Precalculus, and College Algebra through problem-solving in the Mathematics Assistance and Learning Lab and adapted explanations to different learning needs.

Projects

PickUp UCF | Oct 2025 – Present
Technologies: Swift, SwiftUI, Supabase, PostgreSQL, Edge Functions

- Developed a native iOS app for UCF students to discover, create, join, and chat in pickup sports sessions with UCF email verification and real-time data.
- Added map-based discovery, recurring sessions, waitlists, APNs push notifications, and Live Activities backed by Supabase Auth, Realtime, and PostgreSQL.

Lenny Roasts | Knight Hacks 2026
Technologies: Python, FastAPI, React, TypeScript, Three.js, Hugging Face, Neon PostgreSQL

- Built an AI hackathon practice platform that evaluates project pitches, provides category-specific feedback, and compares submissions against 106 simulated competitors.
- Integrated Qwen3 through Hugging Face, FastAPI background jobs, and Neon PostgreSQL with an interactive 3D campus to deliver rubric breakdowns, placement ranges, and improvement suggestions.

FlashPlanner | ShellHacks 2026
Technologies: Python, FastAPI, Gemini API, Google Maps APIs, OR-Tools

- Built a personalized trip planner that creates timed, multi-day itineraries based on interests, budget, pace, and transportation preferences.
- Combined Gemini, Google Places, weather forecasts, and real travel times with OR-Tools to choose and order stops around opening hours and user constraints.

Technical Skills

Languages: Python, TypeScript, JavaScript, Swift, Java, C, C++, SQL, HTML, CSS, Bash
Frameworks and Libraries: React Native, Expo, SwiftUI, React, Node.js, Express.js, Django, Django REST Framework, FastAPI, PyTorch, TensorFlow, scikit-learn, pandas, Three.js, SQLAlchemy
Databases and Cloud: PostgreSQL, MongoDB, Supabase, Neon, Azure, Azure DevOps, GitHub Actions, Docker, Kubernetes, CI/CD
Developer Tools: Git, Git worktrees, Jira, VS Code Extension API, REST APIs, Pandoc, XWiki, Selenium, Beautiful Soup, Hugging Face, Vite, pytest
