Education

University of Central Florida **Expected May 2027**
Bachelor of Science in Computer Science *Orlando, FL*

Experience

Brown & Brown, Inc. **May 2026 – Aug 2026**
Technology Solutions Intern *Daytona Beach, FL*
- Built a JavaScript VS Code extension to triage PR risk, run specialist AI reviews, and publish validated findings to GitHub and Azure DevOps, cutting estimated review time by up to 80%.
- Created PR-review benchmarks and evaluated multiple AI models against them to select the strongest models for risk assessment and specialist review stages.
- Automated Markdown-to-XWiki publishing with Python CI/CD, Git worktrees, REST APIs, and Entra ID, preserving formatting and updating only changed pages.

Handshake AI **Jan 2026 – Present**
AI Evaluator *Remote*
- Evaluated AI-generated media and websites for accuracy and instruction following; tested web apps for visual defects, broken interactions, and missing requirements.

UCF College of Engineering and Computer Science(APPLeSEEd Lab) **Jan 2025 – May 2025**
Undergraduate Research Assistant *Orlando, FL*
- Researched continuous Linux kernel fuzzing and optimized configurations to increase patch coverage while minimizing downtime.

UCF College of Sciences **Aug 2024 – Present**
Undergraduate Learning Assistant *Orlando, FL*
- Guided Calculus I students through problem-solving in the Mathematics Assistance and Learning Lab and adapted explanations to different learning needs.

Projects

Roomate | *TypeScript, React Native, Expo, Node.js, Express, MongoDB, JWT* **Dec 2025 – Present**
- Built a household app for shared expenses, settlements, shopping lists, events, chores, and invite-code access.
- Implemented REST APIs with JWT and email OTP authentication, even or custom expense splitting, balance calculations, settlement history, and spending analytics.

PickUp UCF | *Swift, SwiftUI, Supabase, PostgreSQL, Edge Functions* **Oct 2025 – Present**
- Developed a native iOS app for UCF students to discover, create, join, and chat in pickup sports sessions with UCF email verification and real-time data.
- Added map-based discovery, recurring sessions, waitlists, APNs push notifications, and Live Activities backed by Supabase Auth, Realtime, and PostgreSQL.

FlashPlanner | *Python, FastAPI, Gemini API, Google Maps APIs, OR-Tools* **ShellHacks 2026**
- Built a personalized trip planner that creates timed, multi-day itineraries based on interests, budget, pace, and transportation preferences.
- Combined Gemini, Google Places, weather forecasts, and real travel times with OR-Tools to choose and order stops around opening hours and user constraints.

Technical Skills

Languages: Python, TypeScript, JavaScript, Swift, Java, C, SQL, HTML, CSS, Bash
Frameworks & Libraries: React Native, Expo, SwiftUI, React, Node.js, Express.js, Django, Django REST Framework, FastAPI, PyTorch, TensorFlow, scikit-learn, pandas
Databases & Cloud: PostgreSQL, MongoDB, Supabase, Azure, Azure DevOps, GitHub Actions, Docker, Kubernetes, CI/CD
Developer Tools: Git, Git worktrees, Jira, VS Code Extension API, REST APIs, Pandoc, XWiki, Selenium, Beautiful Soup
